

LALOO Magnification Mirror

2811 C

Parts included in the box:

- A  2 x 1 $\frac{3}{4}$ Wood Screws
- B  2 x Wall Plugs
- C  1 x Allen Key
4 x Set screws (2 exterior, 2 interior)
- D  2 Wall Brackets
- E  1 x Bottom Wall Flange (1 hole)
- F  1 x Top Wall Flange (2 holes)

1. Remove the bottom and top wall flanges from the packaging. (E, F)

2. Using the allen key (C), remove the both wall brackets (D) from both wall flanges (E,F).

3. Slide the top wall flange (F) on to the mirror arm (G) with set screw on the bottom of the wall flange.

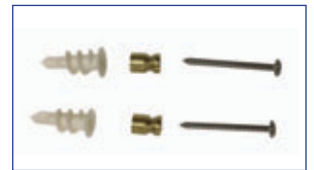

4. Install the bottom wall flange (E) on to the bottom end of the mirror arm (G) with set screw on the bottom of the wall flange.

5. Tighten the interior set screw of the bottom wall flange (E) to the mirror arm (G) using the allen key.

6. Measure 2 $\frac{3}{4}$ " from the centre of bottom flange (E) to the centre of the top flange (F). Tighten interior set screw on top flange and secure to mirror arm (G).

7. Choose the desired height of the mirror on the wall. Mark the pilot holes for top and bottom flange at 2 $\frac{3}{4}$ " apart. Ensure that markings are plumb.

8. Install plugs if there is no backing. If backing is provided, install wall brackets (D) with wood screws (A).

9. Install assembled mirror onto wall brackets (D) and tighten set screws on underside of top and bottom wall flanges (E, F) using the allen key. (C)
