

# INSTALLING MIRROR WITH SHELVING

Mounting Bracket

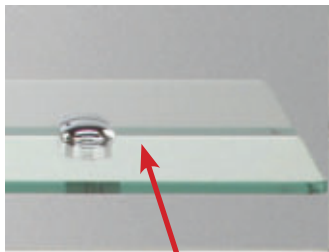

'L' Screw

Mirrors come with **installed** mounting bracket(s) on the back of the mirror and 'L' shaped screws that fit into bracket.

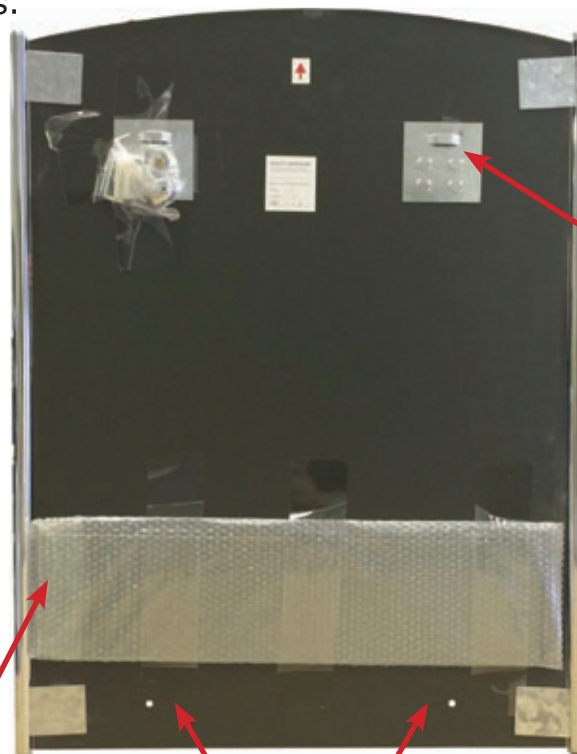

1. Remove shelf from protective wrap. Remove the Chrome shelf brackets from parts bag and fasten to mirror through 2 holes at the bottom. Insert shelf into channel and tighten set screws.
2. Establish Mirror overall height and centre point on wall.
3. Measure down from top of Mirror to bracket and pencil a level line.
4. If installation on a stud(s) is not possible, install self tapping drywall plug(s) as backing for mounting brackets.

Mounting Brackets pre-installed on back of mirror.

Shelf Chrome mounting brackets for shelf insertion.

Glass Shelf is packaged and taped to the back of the mirror.

Pre-drilled holes for inserting shelf mounting brackets.

**Typical packaging of mirror with shelf.**
